Government Encourages AWA's Bighorn Study

AWA has completed its 2005 Bighorn Wildland Recreation Monitoring Project interim report. AWA met with Alberta Sustainable Resource Development in January to share our results and compare them with their monitoring data. We discussed the damage we observed and what trail work and management needs to be done in the study area. AWA provided all provincial MLAs with a copy of our Bighorn Wildland book and the executive summary of the report. We have received some very positive responses, as well as encouragement on our monitoring study.
