ARAAD01010	Reptiles	<i>Chrysemys picta</i>	Western Painted Turtle	Sensitive	Sensitive	Sensitive	Probably fewer than 100 individuals. Known only from specific locations in Cypress Hills, lower Milk River, and Oldman River. Very low population and extremely local and limited distribution; therefore, is vulnerable to site-specific habitat loss.
ARACF12080	Reptiles	<i>Phrynosoma hernandesi</i>	Mountain Short-horned Lizard	At Risk	At Risk	At Risk	Rare and localized. Number of subpopulations appear to be decreasing, but subpopulations themselves seem stable. Occurs in strongly localized and isolated sandy grassland/badland/river break habitats.
ARADB17013	Reptiles	<i>Heterodon nasicus</i>	Western Hognose Snake	May Be at Risk	May Be At Risk	May Be at Risk	Extremely rare. Fewer than 100 site or specimen records from Alberta. Information on population and hibernacula is essential to properly determine status and management requirements. Current population trend unknown.
ARADB26020	Reptiles	<i>Pituophis catenifer</i>	Bullsnake	Sensitive	Sensitive	Sensitive	Population stable or possibly declining. Most vulnerable at winter dens. Requires conservation of prairie grassland, protection of hibernacula, and better population information. Threatened by traffic mortality, direct persecution, and habitat loss.
ARADB36050	Reptiles	<i>Thamnophis elegans</i>	Terrestrial Garter Snake	Sensitive	Sensitive	Sensitive	Common but localized. Least abundant garter snake. Maintenance of stable populations is dependent on habitat protection and public education. Threatened by oil and gas development, and destruction of den sites.
ARADB36100	Reptiles	<i>Thamnophis radix</i>	Plains Garter Snake	Sensitive	Sensitive	Sensitive	Common but localized. Public perception of long-term declines. Public education combined with protection of key habitats (hibernacula) will benefit this species. Threatened by increased human development surrounding oil and gas activity.
ARADB36130	Reptiles	<i>Thamnophis sirtalis</i>	Common Garter Snake	Sensitive	Sensitive	Sensitive	Common but localized. Public perception of declining population. Protection of key habitats and public education will ensure a stable population. Threatened by increased human development surrounding oil and gas activity.
ARADE02120	Reptiles	<i>Crotalus viridis</i>	Prairie Rattlesnake	Sensitive	May Be At Risk	May Be at Risk	Relatively common in localized habitat. Apparent population decline in similar habitat in Saskatchewan. Protection of hibernacula, and public education to reduce human-caused mortality, are essential. Many threats to habitat and population identified.
